

Annual rate of change of north component in the region of the south pole at 2027.5 from the World Magnetic Model - High Resolution (WMMHR) 2025 (core component only). Red - positive (northerly) change, blue - negative (southerly) change, green - zero change. Contour interval is 5nT/year, white star is the location of a magnetic pole and the projection is Polar Stereographic. This is an example of an isoporic chart.
